Education

Virginia Tech, Blacksburg, VA
Masters in Computer Science

Expected December 2026

Virginia Tech, Blacksburg, VA
Bachelor of Science in Computer Science

Expected December 2025

- **GPA:** 3.86
- **Relevant Coursework:** Data Structures and Algorithms, Database Management Systems, Software Design, Computer Organization, Computer Systems, Artificial Intelligence

Experience

Zeta Associates (Lockheed Martin)
Software Engineering Intern

May 2025 – Present
Fairfax, Virginia

- Implemented a multi-tenant Virtual Private Cloud (VPC) infrastructure on in-house hardware, enabling isolated network environments for internal teams and services using **Incus**.
- Utilized and configured advanced networking tools such as OVN/OVS, ACLs, peer routing, IP Address Management (IPAM), and network forwarding to ensure secure and scalable tenant isolation.
- Delivered the multi-tenant VPC infrastructure to serve as a cost-effective alternative to commercial cloud providers, reducing operational expenses while enabling greater customization with internal requirements.

Virginia Tech Competitive Robotics Organization (VTCRO)
Software Lead

November 2024 – Present
Blacksburg, Virginia

- Designed and developed a full-stack web application using **React**, **Express.js**, and **Firebase** to manage 3D print job submissions for a 120+ member organization.
- Implemented a cloud-based G-code upload and print queue system, enabling users to submit print jobs and allowing printers to autonomously pull from the queue when idle.
- Integrated real-time database syncing and role-based access control to support multiple user types (e.g., members, moderators, printer bots).
- Apart of custom print farm which won the Honda Innovation Award at the 2025 National Robotics Challenge.

Projects

Fullstack Movie Application

January 2025 – April 2025

- Designed and built a full-stack movie rental and review platform inspired by Blockbuster and Letterboxd, enabling users to browse, rent, purchase, and review movies and TV shows.
- Developed a responsive front end using **React** and **Tailwind CSS**, integrated with a **Flask REST API** backend and a **MySQL** relational database to manage user data, transactions, and media content.
- Implemented dynamic user authentication, rental logic, and review features, enhancing user engagement and demonstrating scalable architecture for content-driven applications.

Spotify API Web-app

September 2024

- Developed a web application that integrates with the Spotify API to display users' top artists and songs.
- Engineered an interactive "Tinder-style" swipe interface for song recommendations, enabling users to like or skip tracks and improving user engagement through intuitive UI and tailored content using **React**.

Skills

Languages: Java, Python, JavaScript, C, SQL, HTML, CSS, Bash, Shell Scripts

Tools: ExpressJS, React, Flask, Incus/LXD, Docker, Kubernetes, Firebase, MySQL, MongoDB, JSON

Leadership: Eagle Scout – Boy Scouts of America
